LIST OF DON'TS:

- Do not pull or stretch NakeFit in any way
- Do not pull the paper starting from the heel or toes
- NakeFit should not be applied on sweaty, humid, greasy, wet or dirty feet
- Do not apply NakeFit on uneven and jagged surfaces, such as soil or sand. You may have problems during the application
- Do not apply NakeFit in areas that are too windy, because the pad may fly away or overlap on itself
- Do not enter the water before 30/60 minutes from the application of NakeFit: they must first be modeled on the sole of the foot, in order to guarantee better performance and greater comfort!

LIST OF DO'S:

- Apply NakeFit according to the instructions on the package illustrative
- Apply NakeFit on clean and dry feet
- Apply NakeFit on flat and regular surfaces, such as asphalt or floor
- Apply NakeFit 30/60 minutes before entering the water

NOTE: Before application, make sure your feet are clean and dry

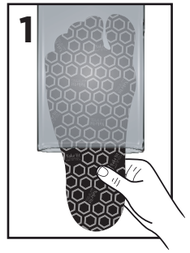
HOW, WHERE AND WHEN TO APPLY NAKEFIT

NakeFit®

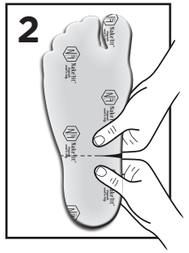
L'originale

Made in Italy

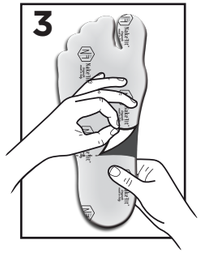
"Feel free with Nakefit"



1 Take a pair out of the bag



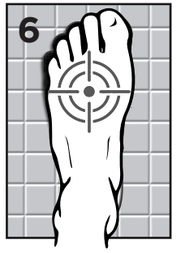
2 Tear the paper at the pre-cut stripe with your hands



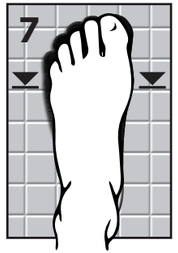
3 Pull off the upper part of the paper (starting from the pre-cut)

4 Place the pad on a flat and even surface

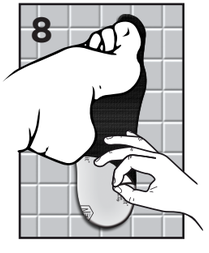
5 Place the heel on the part where there is still protective paper



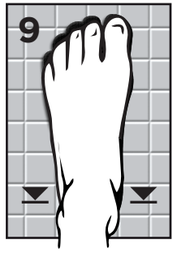
6 Take aim in order to center the toes better



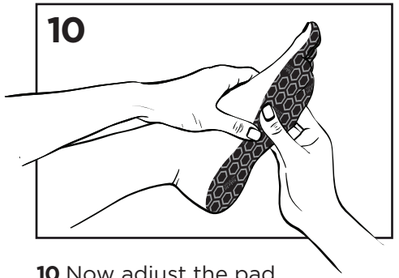
7 Place the foot on the adhesive part, applying pressure



8 Raise the heel and pull off the remaining protective paper



9 Rest the heel on the adhesive part by pressing



10 Now adjust the pad by massaging it gently, until you feel it is one with the foot
